Akdeniz Chemson Code of Ethical Conduct

We Are The Formula!

We have the power to follow the rules.

Dear Akdeniz Chemson employees and our business partners,

The Akdeniz Chemson Code of Ethical Conduct is a formula that shows the chemical harmony between the processes in which we are involved, the world of business, and our conduct. Our regard for one another, moral values, compliance with laws and legal rules, environmental awareness, firm stance against bribery and corruption, and efforts to protect the company's data and intellectual property rights which are the main and essential components of this formula. When all these components come together, Akdeniz Chemson emerges as a highly reputable and prestigious company.

The absence of one of the abovementioned main values from the formula may lead to unexpected chemical reactions and cause irreversible consequences by damaging our reputation in the eyes of our business partners, employees, families and all other stakeholders.

Building a reputation may take many years, just as creating a formula from scratch, while a single wrong reaction can cause that reputation to be lost in mere seconds.

As there is a strong correlation between success and reputation, all Akdeniz Chemson employees and our business partners are responsible for protecting this reputation and achieving success (by constantly applying the right formula). Formulated for the very reason of this purpose, the Akdeniz Chemson Code of Ethical Conduct is a substantial guide to proper business management.

I would like to remind you that it is important to keep the abovementioned formula in mind, to refer to the said guide in case of doubt, and to contact the relevant departments in accordance with the rules, when necessary, in order to adopt ethical ways of working at all times.

We are working in different regions of the world for Akdeniz Chemson, an industry-leading organization that has always maintained its reputation with its well-intended, honest, and ethical business management culture. I am certain that the confidence in our Company's ethical stance will continue and increase with your help. I have no doubt that you are going to act with formula suitable for our chemistry in this endeavor and I would like to thank you for joining us on this journey.

Sincerely,

Ersin İzmirlioğlu
CEO
